## Certificate III in Conservation and Ecosystem Management

### Location

Please call 1300 737 454 for exact course location.

### Mode

Classroom and practical based training and assessment.

### Duration

TBA

### When

Contact our team on 1300 737 454 to commence your training enrolment.

## Is this course for me?

This qualification will provide you with the practical skills and knowledge to work effectively in the horticulture industry.

Through theory and practical course work you will learn to:

- Recognise and care for plants
- Control weeds and plant pests
- Identify plant disease and pest signs
- Control weeds
- Implement soil improvements for gardens and turf

You will need to have an interest in plants, and a genuine desire to work within the horticultural industry. You must be prepared for working outdoors in all weather conditions.

## Career Opportunities

This course has a variety of career opportunities and is applicable to a diverse range of roles in the horticulture industry:

- Community Facilities Landscape Assistant
- Gardener
- Landscaping Assistant

## Entry Requirements

There are no prerequisite entry requirements; however you must:

- Show a satisfactory level of language and literacy skills, which will be established at the time of enrolment
- Show a genuine interest in horticulture

## Core Competencies

There are 16 units to be completed in this qualification, 2 core units and 14 elective units. The course structure is made up of the following:

### Core Units
